Jailed at and Fed. When Pleaded by Brutal Jailers and Ignorant Mexican Peons, Who Terrorize Their Charges.

[BY ASSOCIATED PRESS.]

Vera Cruz, Mexico, April 28.—Sleeping on the stone floors of the jail at this time with insufficient food, no sanitation, and threatened every night with assaults by drunken jailers, is the condition of Americans, including women and children, confined at Cordova.

W. H. Mechling, of the geographical survey for Canada, who has been for some time in Mexico in behalf of the University of Harvard, Pennsylvania and Columbia, spent two days at Cordova. He went to the jail at Cordova Sunday afternoon and talked with prisoners, several among whom he was acquainted with. They begged him to communicate their plight to Consul Canada and Rear Admiral Fletcher in an attempt to effect their release.

Herded Like Cattle.

The prisoners were herded like cattle and jerryed by keepers and the Mexicans of the jail. They are permitted to have food and water only when the whim suits the jailers and they are kept in a state of terror by the threats of death.

Among the prisoners is a young American woman with a four-month-old infant. They are sent to the jail with their families and the total number of all nationalities, according to Mechling, is 55.

Prominent Citizens.

Among the men prisoners is Capt. Henry of the La Vioja. Hermon, a station of Vera Cruz state, who entertained John Lind, President Wilson's representative, a few months ago.

Mechling says there are 57 persons, chiefly Americans, at the Cordova State of Vera Cruz from surrounding plantations and Consul Wright is in jail at El Hule near Texcoco.

BRYAN THANKS THE GERMAN GOVERNMENT

Secretary Informally Conveys Obligation to German Government for Recalling the Steamship "Arminia" with War Prisoners to Mexico and for the Assistance Given by the Commander of the German Steamship, Dresden, in Rescuing American Refugees at Tampico.

[BY ASSOCIATED PRESS.]

Washington, April 28.—The thanks of the American government to Germany for its friendly action in recalling the steamship "Arminia" with war prisoners to Mexico and for the assistance given by the commander of the German steamship, Dresden, in rescuing American refugees at Tampico, has been informally conveyed to Germany through Secretary Bryan.

The reason for the withdrawal of the American naval forces from Admiral Mayo at Tampico, said an official at the navy department, was that Admiral Mayo was informed by persons in intimate touch with the situation that it was necessary for the safety of all foreigners that the United States navy vessels should not be near the coast. Admiral Mayo agreed with Admiral Mayo and the department endorsed the action.

ADMIRAL MAYO REPORTS THAT FEDERALISTS SEEK COMBINATION OF FORCES

SITUATION AT TAMPICO

Withdrawal of American Ships From Port Was Made Upon Promise of British to Care for Refugees.

[BY ASSOCIATED PRESS.]

Washington, April 28.—Rear Admiral Mayo of Tampico reported today that the federal forces there are making further overtures to the constitutionalists for combination against the United States. He said the constitutionalists still are firing on the city.

Admiral Mayo reported that Admiral Craddock of the British cruiser Hermione had dispatched Major Clark and a detachment of British royal marines forty miles inland from Tampico to rescue eight Americans at Orange Hill and is expected back tonight.

The Hermone sent thirteen refugees aboard the Des Moines today. Admiral Mayo reported that it would be inadvisable to send the Hermone to the Yucatan district, "as it might start anti-American demonstrations."

Tells Reasons.

In replying to the representatives from Tampico that American citizens were being held because of the departure of American battleships from the river, Secretary of the Navy Daniels said today that this action had been taken after Admiral Craddock had informed Admiral Mayo that he would proceed to transfer Americans from Tampico on board the Hermone. The result of this arrangement would make anti-American demonstrations in Tampico less likely.

Admiral Mayo reported that he had sent a British ship to have said to Admiral Mayo.

FEDERALS ATTEMPT TO CROSS BOUNDARY

Force Credited With Attempt to Blow Up International Bridge Again

Reported at Laredo.

[BY ASSOCIATED PRESS.]

Washington, April 28.—Two federal gendarmes and their commands, who were divided by the constitutionalists from the southern part of Nuevo Leon, are attempting to cross the United States border about thirty miles from Laredo, according to a dispatch reported by the state department today.

It is supposed that these federalists are a part of the command which destroyed the international bridge between the Mexican town and Laredo, Texas.

They afterwards left for the south to join other forces which are supposed to be operating between Nuevo Laredo and Monterey.

Left Wide Trail.

Mexican federalists retreating from Nuevo Laredo left a trail of devastation behind them according to word received here today. The towns of San Pedro and La Jaria were completely destroyed and the invaders have fled to the hills.

Officially Reported.

Laredo, April 28.—The constitutionalist commander of Nuevo Laredo today reported that federal troops, who on Friday evacuated the town of Nuevo Laredo, were today trying to cross the Rio Grande above Laredo. The United States troops at Minera are to be on guard but American officers said nothing had been seen of them at noon.

Frequent Irregularities Among University Students Arouse Officials to Action.

[SPECIAL TO THE GAZETTE.]

Madison, Wis., April 28.—A series of irregularities involving conversion of money proceeds of various university activities by students having the funds in charge has led the student court at the state university to issue a strict accounting system for all students of money. The system is being worked out in cooperation with the university authorities. The remedies proposed are the bonding of all such student officers and the institution of a system of auditing committee officers. The penalty for violating the proposed rules may be expulsion.

A student handling business affairs of the Daily Cardinal last semester was forced to give up the position because of a shortage of about \$800 existed. A settlement has just been made and the student is back in school. A similar deficiency occurred in the business management of the Daily News, a university paper, which was merged with the Cardinal a few months ago, was settled with the student's father, who made a settlement of about \$200. A student in charge of the financial affairs of the Sphinx, a humorous periodical, was brought before the student court charged with a shortage of \$32. The student's father of last year's annual was charged with embezzling \$27.50. The student court brought by a St. Paul printing company to recover \$2,500 on a printing contract. TOWNS WILL APPLY FOR STATE ROAD AID

Entire Amount of State Appropriation Will Be Taken According to State Engineer Hirst.

[SPECIAL TO THE GAZETTE.]

Madison, Wis., April 28.—About \$3,600,000 will be spent in the construction of highways in the state next year. In a letter to the division engineers and county highway agents in the state, A. R. Hirst, state highway engineer, said that the state aid for that state aid will be more than called for again this year. "He urges that the counties and towns keep down the appropriations so that the state will not overreach the expenditure of \$3,600,000. The state has already appropriated \$1,200,000 as its share of state aid for next year.

The claim has been made that the members and employees of the state highway commission have contributed very largely to the tremendous amounts voted by their activity in requesting and promoting them, and that the state aid for the federal employees exhibit any undue activity in this regard," writes Mr. Hirst. "This of course does not mean that when requested to give information and data in connection with the state aid, they may not give it, but we must not urge action by towns or county boards, or assist in pushing subscription schemes of any kind, except by the state highway commission, which should be supposed to possess in regard to the provisions of the law."

Mr. Hirst's statement that the total appropriation for state highway aid made will be indicated by a statistical table, which he encloses in the letter to the division engineers. He has received replies to a report in which 121 towns voted taxes this year, which is 68 percent of the total towns heard from. Of the total number voting taxes, 325 voted taxes both years, 47 voted taxes in 1913 but not in 1914, and 160 voted taxes in 1914 but not in 1913. Of the same towns reporting in 1913 aid to the amount of \$385,908 was voted last year as compared with \$327,742 this year. The reduction of \$58,166. The percentage of total taxes voted by the same towns in 1914 is over 82 percent, according to the records of the state highway commission.

WILSON WILL ORDER TROOPS TO COLORADO

PRESIDENT DECIDED TO TAKE IMMEDIATE ACTION AFTER CONFERRING WITH CABINET.

WILL END CIVIL WAR

Fighting Resumed With Renewed Vigor at Several Mines Last Night Was Still in Progress Today.

[BY ASSOCIATED PRESS.]

Washington, April 28.—President Wilson today decided to order the federal troops to Colorado for aerial action in the coal strike district where virtually no coal exists.

The decision was reached after the president had talked over the Colorado situation with his cabinet during the greater part of the two hours session. A proclamation will be issued later today ordering the federal soldiers to service in Colorado. The number of troops decided upon will be determined at the conference between President Wilson and Secretary of War Garrison at 2 o'clock this afternoon.

Need Federal Troops.

Washington, April 28.—President Wilson's call today was Senator Thomas of Colorado, who discussed the Colorado coal strike situation. Following his visit the President and Secretary Garrison went into a conference to decide what could be done to bring the situation under control. From the conference they went to the Governor's Ammons for the federal troops in the strike district. Senator Thomas believed that the troops will be ordered to the strike district to stop the coal strike.

Federal's Mission Fails.

After talking with Secretary Garrison the president reported from Chairman Foster of the house mines committee on the situation. Following his visit the President and Secretary Garrison went into a conference to decide what could be done to bring the situation under control. From the conference they went to the Governor's Ammons for the federal troops in the strike district. Senator Thomas believed that the troops will be ordered to the strike district to stop the coal strike.

Trouble Starts Afloat.

Walsenburg, Colo., April 28.—At seven this morning Sheriff Farr reported the fighting at the Walsenburg mine near Walsenburg resumed with vigor. Fifty men of the local militia which arrived here late last night were outnumbered ten to one and a clash between them and the strikers was expected at any moment.

No further report was received at this hour though fighting had continued all night.

Fighting at Bowlder.

Bowlder, Colo., April 28.—Fighting between strikers and the federal troops at the Hecla mine at Louisville which began at 10:30 last night continued at 8:30 today. At that hour two guards had been slightly wounded, according to the Bowlder. No fatalities were reported.

A posse of Bowlder citizens was organized by Under-Sheriff Euler and sent by District Attorney Martin to go to the relief of the besieged miners.

The Hecla mine is located about one mile by the mountains on one side and by a public road beyond which is a row of houses and cabins. Sheriff Buster of the local distance telephone today that strikers were using these houses and cabins as protection. For two hours last night he was caught between the two sides and fired at the strikers in a store until about four o'clock morning when there was a lull in the shooting. He sent his deputies, A. J. Krist and L. A. McDonough, who were able to gain an entrance into the mine.

Take Refuge in Cellars.

A brisk fire was started at 6:20. Sheriff Buster stated that under orders from him machine guns had not been used by the miners as their first aim was to destroy the town. Women and children of the strikers have taken refuge in the cellars of their homes.

Militia Face Fight.

Trinidad, Colo., April 28.—A force of 500 militia men is facing a body of strikers of more than 2,000. The army is concentrated in Las Animas and Huerfano counties. The southern militia is concentrated in the town of Trinidad. The Chandler mine was captured and in Bowlder county the Lignite cold fields, north of Denver.

Move Arms Away.

Bowlder, Colo., April 28.—Hardware dealers at the two towns have turned over their stocks of arms and ammunition to the authorities and arrangements were made with the Colorado authorities to have the arms returned to them. At 10:30 several armed telephone line men left here today in an effort to restore telephone communications.

Ammons Proclamation.

Denver, Colo., April 28.—The issuance of a proclamation by Governor Ammons to "All law abiding and peace loving citizens of Colorado" to give their moral and active aid to the restoration of peace in the strike district called attention today to the condition which the proclamation describes as "a state of insurrection."

The proclamation said the state authorities had been detailed to restore order and declared that until this is accomplished there can be no attempt to obtain justice in court. The proclamation concludes: "Officers have the right to go to any place where they believe there is a hold for conspiracy, even if caught with arms or ammunition or attempting to ship to any part of the state or calling for volunteers or organizing companies of men to be used against the constituted authorities of the state."

Dead and Wounded.

Weasenberg, Colo., April 28.—One dead and one probably fatally wounded and two slightly injured were the toll of the dead in the night between strikers and mine guards in this vicinity, which began yesterday afternoon at the McNally mine and during the attack on the Walsenburg mine at the edge of town. At 11 o'clock the firing had ceased.

LODGE CELEBRATION WAS WELL ATTENDED

Rev. William Leighton of Milton Gives Address at I. O. O. F. Anniversary Celebration.

Over four hundred people affiliated with the I. O. O. F. order and guests, attended the ninety-fifth anniversary of the organization of the Odd Fellows lodge with ceremonies and dance at the East Side lodge hall last evening. The observance of the anniversary this year eclipsed previous celebrations due to the efforts of the committee in charge. J. F. Carle, chairman, gave the welcoming address, which was responded to by O. D. Antislard, grand noble of the Wisconsin lodge number 14 in the absence of Mayor J. A. Patters. Mrs. Lynn A. Whaley, and Geo. Hatch rendered songs. Mrs. Thurston Watson, Mrs. J. R. Day and Miss Esther Barker, readings, and Miss Calla Schwartz a piano solo. The principal address of the evening was given by the Rev. W. Leighton in a scholarly manner, the value of fraternal brotherhood especially in America and the benefits derived from an institution such as the Odd Fellows. In part Dr. Leighton said:

"Every age has its central idea or controlling principle. From history we learn that the age of Greece was the age of letters and art; the Middle Ages were characterized by religious enthusiasm uncontrolled by science and unrestrained by knowledge or reason or experience. Then came the age of military despotism, when tyranny exercised absolute and unlimited and uncontrolled power. The idea of the present age is fraternity—a brotherhood that fosters love of country and of family, benevolence toward the needy, sympathy for the distressed and by love for those in affliction. Humanity and charity are what have contributed to our civilization and the triumph of Christianity. The principles of brotherhood, friendship, love and truth are the great basic principles of true religion."

OBITUARY.

Mrs. John Peel.
The death of Mrs. John Peel, formerly Sarah Thoroughgood of this city, came as a shock to her many friends in Joliet and Janesville. She was born in England May 9th, 1859, and came to Janesville when a little girl. She made her home here until her marriage. During her stay in Janesville she attended the Trinity Episcopal church.

Her father, the late John Thoroughgood, was twice mayor of Janesville and founder of the Thoroughgood Box Factory and Lumber Company in this city.

Of the immediate family deceased is survived by her stepmother, who resides in this city, and two half-sisters, Mrs. Alice Kimball and Mrs. Ada Higgins, of Madison and Monroe respectively.

For six years Mrs. Peel made Joliet, Illinois, her home. She was prominent in fraternal circles and spoken of as being a descendant of one of the finest and best established families in Janesville. Her death came as the result of an unsuccessful operation for appendicitis. Her husband, a well known railroad man, survives.

Mrs. Amelia Gardner.
The death of Mrs. Amelia Gardner, nee Amelia Moshier, at the city hospital in Calgary, Alberta, Canada, her home city, on March 30th, has spread gloom among those friends and acquaintances in this city who knew her. After suffering for many months, an unusual operation was performed, from which she never rallied.

Mrs. Gardner was thirty-six years of age, and had made her home for the past six years in Canada. A husband, one son, aged thirteen, and a baby daughter, aged ten months, survive. The remains were brought to this city for burial, arriving this noon, and were accompanied by her husband and Attorney A. S. Faurey, of Calgary, Alberta, Canada, executor of the will. Her mother, Mrs. Anna Schewmerhorn, resides at 434 North Franklin street, in this city. The funeral will be at Oak Hill.

Mrs. Patrick Bennett.
Funeral of Mrs. Patrick Bennett will be held Wednesday morning at the St. Patrick's church at nine o'clock. Interment will take place at Mt. Olivet cemetery.

Mrs. Edward Rotherham.
Private funeral services will be held for Mrs. Edward Rotherham at the home, 170 Linn street at two-thirty o'clock Wednesday afternoon. The Rev. Joseph Chalmers Hazen will officiate.

DEPARTMENT GIVES INSTRUCTIONS HOW TO MAKE GARDENS

Proper Housing Important for Success in Chicken Raising—Government Agricultural Notes.

Washington, April 25.—The department of agriculture is becoming the home vegetable garden. Every suburbanite would be better off in devoting his time to the development of an edibles than to monkeying around with flowers in the plot back of his bungalow, according to the department experts.

A half acre devoted to various kinds of garden crops will easily supply a family with \$100 worth of vegetables during the year. A bountiful supply of fresh vegetables, close at hand, however, is of more importance than the money value. The department has just issued a handsome little book telling of all useful things about the home garden.

First of all the booklet advises that the land have sufficient fall to drain off surplus water during heavy rains, but not so much fall that the soil is washed away. The garden work and do things depression where puddles can remain. A good fence around the plot is indispensable. The soil should be well plowed up and pulverized. Hand spading is unnecessary.

Nearly every city dweller, sooner or later gets enthusiastic about the subject of chicken raising. So the subject of dwellers, for that matter. There have been many wonderful stories of fortunes made out of chickens and egg production. But the prospective chicken raiser must realize that the business is a scientific one. It is not a matter of getting the first things to be learned about chicken raising, in the opinion of the department, is the importance of proper housing for the fowls. The department has just made public in a little booklet, experts' recommendations for a poultry house that is suitable to practically every climate.

Be it known that there are two popular ways to raise poultry—the "intensive" and the "colony" systems. The first claims to have steady long stationary houses used. It is easier, however, to keep birds healthy and to reproduce stock under the second system, the department believes.

Under the colony plan, the fowls are allowed free range, the houses, which hold about 100 hens each, being placed from 200 to 500 feet apart, so that the stock will not kill the grass.

This system may be adapted to severe winter conditions by drawing the colony houses together in a convenient place at the beginning of winter. The "intensive" system is more suited for hens used solely for the production of market eggs than for those used to breed stock.

Fences mean a great deal of money and this outlay is more or less continuous, as they must be maintained after being installed. There should be as few fences as possible dividing the lots. The cheapest and best can be kept "sweet" more easily if not fenced, and fresh, sweet land is a valuable asset in poultry raising.

On good soil a greensward may be kept by about 200 to 250 square feet of land per bird. This means 217 or 174 birds to the acre. Plymouth Rocks and the other heavy variety meat birds in small yards require fences 5 to 6 feet high, while a fence 6 or 7 feet high is necessary for Leghorns.

All poultry buildings and fences should be painted or whitewashed. The latter is the cheapest of all paints and may be used for exterior or interior surfaces. It can be made by slacking about ten pounds of quicklime in a pail with two gallons of water, covering the pail with cloth or burlap and allowing it to stake for one hour. Water is then applied to bring the whitewash to a consistency which may be applied readily.

The horticultural board is out with a warning against seed found in bales of imported Egyptian cotton. Faulty sowing occasionally leaves these seeds. They should be burned, as the larvae of the pink boll worm may be contained in the seeds. This pest is very destructive to American cotton. Ginning and storing does not kill the larvae. The "bugs" have been found to withstand seven months storage in cotton.

A strict quarantine has always been maintained against the boll worm. An agent of the horticultural board is now visiting northern and southern mills to investigate the amount of infection by the worm in cotton introduced from Egypt.

LUCILE M. CARPENTER IS GRANTED A DIVORCE

Lucile M. Carpenter secured a divorce from Charles H. Carpenter, both of Janesville, in Judge Grimm's court on Wednesday. The grounds for the separation were cruelty and non-support. The defendant was formerly landlord at the Railroad hotel. A division of property was arranged for in the judgement.

BELOIT YOUTH HELD HERE UNTIL TRIAL

Eighteen and Sixteen Year Old Boys Rob Beloit Man Saturday Night.

Alvin Van Veen, aged eighteen, of Beloit, was brought to the Rock county jail yesterday afternoon to await trial Wednesday morning for a daring theft of jewelry and valuable goods, said to have amounted to six hundred dollars, from John Anton, proprietor of a shoe stand in Beloit. Ray Bemis, sixteen years old, is also complicated in the theft and District Attorney Dunwiddie will prosecute the case.

The robbery was committed Saturday night and was discovered Sunday morning. The Greek, finding over a hundred dollars in these a traveling bag, fifty dollar watch, articles of jewelry and clothing missing. When the police started investigating, the two boys belonging to the department were found in the jail, and in a tent where they had been camping near the bridge of the Interurban company. The watch and some of the loot was found here and the pair confessed to the crime Monday morning. The bag and the notes and the greater part of the clothing had been sunk in the river by Van Voorhis and Bemis, which was recovered by the police with grapple hooks.

The pair were brought before Judge Clark Monday and held for examination set for Wednesday. Bemis, furnished with a hundred and fifty dollar bail set by the court and Van Voorhis is being held in custody at the county jail.

Charles Morgan of Beloit, started to serve out a ten-day sentence on the charge of drunkenness this morning. John Jacobson, sentenced to twenty days by Justice Fred W. Jenness at Edgemoor, started to serve time at the county jail this morning. Besides the twenty days, Jacobson had a very sore head, which he alleges was given to him when arrested.

MILTON

The entertainment by the Apollo Concert company Saturday evening was one of the best a Milton audience has had the pleasure of hearing in many a day. The recitals were consistent and numerous after each number and were generously responded to. The following program was rendered:

PART I.
Apollophone—March—"Brooks" Chicago Marine Band. Sitze
The apollophone is an instrument designed and perfected by the Apollos and is the only one of its kind. It belongs to the percussion family of instruments, and embodies all the better qualities of the xylophone and marimbaphone, retaining the brilliancy of the former and harp-like tone of the latter.

PART II.
Aiolophone—"The Celebrated Over-tune, 'Raymond'." Thomas Soprano Solo—"Morning." Miss Gladys Harding.
Banjo Solo—"Entry of the Gladiators." Fucik
Cornet Solo—"Value of Concert." Arthur Wells.
Musical Reading. Selected Saxophone Quartet—March, "The Banqueters" (New). Holmes Note—(Written especially for and played at the I. L. A. convention banquet, 1913.)

A delegation of forty members of Du Lac lodge, I. O. O. F., attended services at the Congregational church Sunday, on invitation of the pastor.

Dr. C. Blinewies and wife of Janesville, were in town Sunday. Miss Van Horn of Gentry, Ark., is visiting Milton friends.

Man of True Charity.
The man who is always abusing the motives of others is never quite certain of his own—or perhaps he is only too certain of his own, knowing them to be selfish and interested. He who can fervently cherish a certain opinion and yet believe that a believer in the exact contrary may be equally sincere is the man of a genuine charity.

ERUPTION ON ANKLE GREAT SUFFERING

Many Nights Did Not Sleep. Burned All the Time. Wore Bandage Night and Day. Used Cuticura Soap and Ointment. Now Well.

Kingsville, Mo.—"My trouble began eighteen years ago. Nearly half of the time there were running sores around my ankle; sometimes it would be two years at a time before they were healed. There were many nights I did not sleep because of the great suffering. The sores were deep running ones and so sore that I could not bear for anything to touch them. They would burn all the time and sting like a lot of bees were confined around my ankle. I could not bear to scratch it, it was always so sensitive to the touch. I could not let my clothes touch it. The skin was very red. I made what I called a cap out of white felt, blotting paper and soft white cloth to hold it in shape. This I wore night and day.

"I tried many remedies for most of the eighteen years with no effect. Last summer when my ankle had been sore for over a year and a half more than ever before I sent for some Cuticura Soap and Ointment. It would itch and burn, besides a great burning that I think I could never explain. The very first time I used Cuticura Soap and Ointment I gained relief; they relieved the pain right then. It was three months from the time I commenced using Cuticura Soap and Ointment until the sores were entirely healed. I have not been troubled since." (Signed) Mrs. Charles E. Brooke, Oct. 22, 1913.

Cuticura Soap 25c. and Cuticura Ointment 50c. are sold everywhere. Liberal sample of each mailed free, with 24-p. Skin Book. Address post-card to Cuticura, Dept. T, Boston.

Men who shave and shampoo with Cuticura Soap will find it best for skin and scalp.

CLAIMS WIRELESS WAVES KILLS PELICANS AT SEA.
[SPECIAL TO THE GAZETTE.]

San Diego, April 23.—Humane officer Mutters today sent a formal appeal to the government to make its big wireless station at Point Loma step killing pelicans. Pelicans used to be thick in San Diego harbor. Now there are only a few of them. Mutters is sure the powerful radio waves which station sends out do the mischief. He says he has seen scores of birds suddenly stricken in mid-air fall dead into the water. The waves might be toned down, he thinks, so as to do less damage.

Clark Griffith's Senators are being very favorably mentioned in connection with the American league race this season. Griffith himself has said that we may depend upon seeing his boys cop the rag and there are quite a few others who agree with him heartily. "I have a much better ball team than I had last year," says the Old Fox. "I have now what I lacked then—good reserve strength. Smith, the utility player from Atlanta, can cover any infield position almost as well as any of the regulars. It's really a shame that he should be kept on the bench. Gedeon is almost in the same class with Smith. I think I have the two best catchers in the league in Ainsmith and Henry. Of course, I don't have to dwell on the value of Walter Johnson. And I don't think we'll miss Bob Groom, because my young pitchers are coming along in wonderful shape. In my rookies live up to what I will be able to beat out Connie Mack. Ayers is one of the best youngsters I ever saw and Engel, Shaw and Cashen are strong and fast. Harper and Bently are two unusually promising southpaws. I don't mind saying to those interested that if we don't grab the rag it'll be because an epidemic of measles has ravaged our camp."

Clark Griffith, by the bye, says that organized baseball should present President Gilmore of the Feds and all of his associates with a large, gold medal. "They've been a great blessing," says Griffith, "because they have rid us of a very undesirable element. A big percentage of the players who went over to the Feds were the disturbers and trouble makers." And while of course there is probably a modicum of truth in that, it shouldn't be forgotten that quite a few of them were run makers and hit makers. It's easy to believe that a number of big league owners would be willing to have a few of their trouble makers back.

Frank Chance is doing something new in starting a season in the major league with a complete new outfield. Seldom, if ever, has such been done before. Last year his outfield was occupied by Greig, Daniels and Walter. This season he has Holden, Walsh and Cook. The new idea seems to have been to get together an outfield that could at least bat if they could do nothing else. All three of the men he has in his outfield this year are there with the hope that they may not shine brilliantly on the bases. Walsh, the ex-Athlete, is the star of the group and a big winner wherever placed.

The White Sox have picked up a player named Demmitt and it's to be hoped that he can say something more than that when he gets a raw decision.

ROD AND GUN CLUB WILL BE ORGANIZED

Two Hundred Local Sportsmen Interested in Movement Will Meet Tonight at the City Hall.

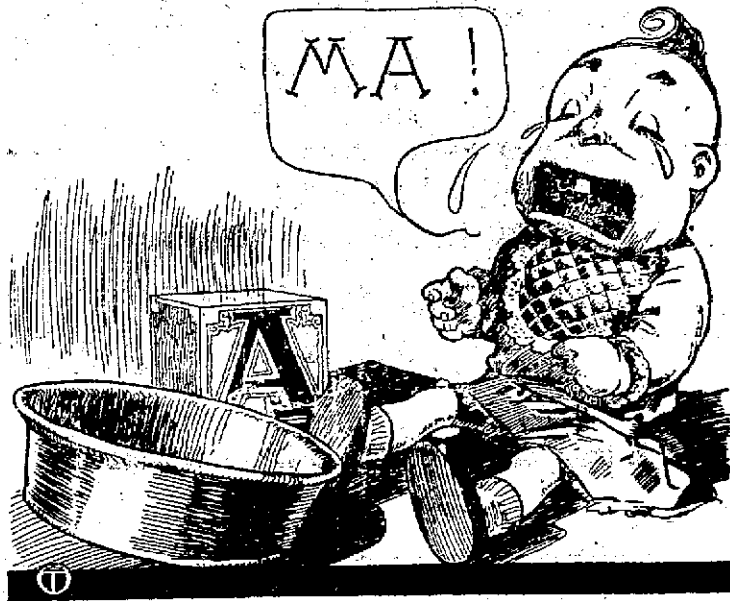

Janesville sportsmen interested in an organized movement for the propagation and protection of fish and game will meet at seven-thirty o'clock this evening at the city hall assembly room to organize a local "rod and gun" club. State Game Warden John A. Sholtz of Madison will be at the meeting and will explain what is being done through the medium of local societies which are co-operating with the state game warden's department to secure obedience to the game laws, much to the improvement of hunting and fishing during the open season. Those interested in a club for Janesville had thought that fifteen or twenty might be secured as members, but the interest has been so general that it is probable that over two hundred men will be enrolled tonight. All who are interested in the movement are urged to be present tonight.

As soon as the local club is organized efforts will be made to secure fish

Bank's Notes Never Released.
After returned Bank of England notes have been noted in the register they are canceled. This is done by cutting off the signature of the chief cashier, which is at the bottom of the note. Thus mutilated, the notes are packed into sacks and kept for five years, when they are burned. A five-years' accumulation amounts to about 100,000,000 notes. If they were laid in a pile they would reach a height of almost seven miles, and they would weigh close upon 120 tons.

THREE SLUGGERS OF AMERICAN LEAGUE ARE HITTING AROUND THE .500 MARK

Sam Crawford (left) and Gus Williams.

While the old star sluggers of the American league are not yet in their stride, some other players of the Bar Johnson organization who have made only reasonably good records in the past are hitting around the .500 mark. The first issue of American league averages shows Gus Williams of St. Louis leading all the rest with a batting average of .500. John Collins of Chicago and Sam Crawford of Detroit tie for second place, with an average of .467.

Must Not Whistle in Russia.
In certain cities of Russia street whistling by civilians is a penal offense, the privilege being reserved for the police, who exercise it, however, not in order to make tunes with their mouths, but to send signal blasts to each other. The whistling habit being hereditary, it soon disappears, and in these cities no difficulty is experienced in dealing nowadays with the few who offend.

COUNTY ASSESSORS DISCUSS PROBLEMS; GET INSTRUCTIONS

Assessment of Livestock, Automobiles and Other Personal Property Especially Considered.

Assessors from the various assessment districts at their annual session called by County Income Tax Assessor F. A. Taylor, were again urged to far as they could determine in their best judgment what was the actual value. Practically every assessor in Rock county attended the meeting held today in the circuit court room of the county house and a number of the township chairmen on hand to take part in the discussion.

Much the same problems that have come up in former years at the assessors' meeting were considered to and Mr. Taylor was persistent in his instructions to assess at true value. The assessors objected to the true value placed on cattle in Rock county in the report of Supervisor of Assessments Taylor, the figure being \$45.16 per head against \$30.00, the value placed by the assessors. Several of the assessors called attention to the fact that perhaps more than fifty percent of the cattle in the county was young stock and was sold, and that on every stock farm there was a number of head of scrub cattle or "canners." These bring down the average, they contend, although it is generally admitted that good cows are worth considerably more than the average.

In this connection the question was raised regarding the assessment of blooded or registered stock. Such stock sometimes sells at abnormally high figures, it was pointed out, and the question was asked whether the sale prices should be taken for assessment purposes. With very slight modifications possible in some instances Mr. Taylor believed that the law as it followed could hold if the law as it followed the attitude that breeders' registered stock were at great expense to keep up their herds and to advertise their animals. It took a rich man to raise pedigree stock, he contended, and if the government was to be encouraged and assisted by moderate assessment.

It was also pointed out in this connection that blooded stock was subject to great depreciation from year to year, which should also be taken into consideration, and that it is also true that owners of registered stock often hold for high prices which they could not secure if they were to be considered by the assessors before they place their values. Automobiles also have proved a difficult article to assess, it was evident from the report of assessor Taylor. Persons buying new cars in the spring should be assessed at virtually the price that was paid for them, according to Mr. Taylor, although it is true that the owner who pays his taxes after his machine has depreciated in value for nearly a year fall to take in consideration the fact that the assessment figure was fixed when the car was new. In the case of machines in an agent's possession at the time of assessment Mr. Taylor instructed the assessors to assess them to the dealer or the person in whose charge they were.

In cases Mr. Taylor made a plea for more careful work on the part of the assessors, whom he admonished to adhere to the scale determined upon in the tobacco growing districts of the state, assessing binders \$25 and fillers at \$10 per case. This would usually result in the placing of a fair valuation, he contended, although one assessor called attention to the fact that the same group was often assessed four times before it was valued, while it depreciated greatly in value during the time in which it was held.

Discussion at the assessors' meeting during the afternoon concerned the assessment made by the local assessors and the true values as fixed by Mr. Taylor as the supervisors of assessments. Mr. Taylor conceded to the gentlemen present that the values of property in their districts were better than he could and that it was within their power to secure a better and fairer assessment than was possible from outside sources. He was, however, from a reason that he pleaded with them to follow the law as far as possible, he said, and in this way avoid a reassessment. He had worked with the Beloit assessors, he further contended, in order to prevent the state tax commission from thus avoiding the dissent and expense which such a proceeding could not help but entail.

MINSTREL SHOW IS CREATING INTEREST

Lakota Club Production Introducing Specialty Acts To Be Best Ever—Parade Was Held at Noon.

The coming of the Lakota Minstrels tonight at the Myers theatre has created interest in the city that is intense. People are wondering just what kind of a show the Janesville club of talented young men will offer to the public.
The name Lakota Minstrels is familiar to the people here, having heard the shows in the past, and once are ready to offer a favorable criticism on the productions. The members of the Lakota club are certain that their acts this year will satisfy the entire audience. With such men as Bill Ponichen, Walter Carle, Dr. S. F. Richards and Howard Clithero on the string line, not to speak of the rest of the bunch, the club are offering a high class minstrel show hard to be equalled.

LANDIS ENJOINED BUTTER COMBINE

Decision Handed Down That Affects General Market for Butter Throughout This Section of the Country.

Chicago, Illinois, April 23.—Judge Landis yesterday issued a sweeping decree enjoining the Elgin board of trade, its officers and agents, from artificially fixing prices on butter and from continuing the operation of the board's quotation committee. The decree, which was entered by consent of counsel for the defendants, is a victory for the government in that it meets all of the demands made by District Attorney Wilkerson in the original bill filed in December, 1912. Acceptance of its terms by the defendants brought the anti-trust suit to an amicable settlement without a trial.

The court's order permanently enjoins the Elgin board of trade, its officers, Charles H. Potter, H. C. Christians, J. P. Mason, Colvin, N. Brown and A. C. Hawley, from further engaging in a combination and conspiracy to restrain interstate trade in the purchase and sale of butter.

The degree further enjoins the board from:

Quoting or publishing any price or prices of butter purporting to be "market prices" or "Elgin prices" or the prices obtaining upon the board of said defendant corporation, unless the exact source of such prices, which have been actually obtained upon said board in bona fide sales of butter.

Fixing or determining by contract or agreement, the bids or offers which members of said Elgin board of trade shall make with respect to purchases or sales of butter in advance of the making of bids or offers.

Making fictitious or washed or pretended sales or purchases of butter for the purpose of misleading any person as to the actual price at which butter is being sold upon the board, which is being used as a basis in any way as a basis for the making of quotations.

Making or participating in or knowingly permitting on the board at any time any sale or purchase of butter which is not a bona fide transaction in which the seller in good faith intends to deliver the commodity and the purchaser in good faith intends to accept and pay therefor.

By the terms of the decree the activities of the Elgin board are now limited to providing a place for its members to engage in making actual purchases and sales of butter at prices governed by supply and demand.

An anti-trust suit involving a similar situation in that against the Chicago board of trade and its officers, was heard by Master in Chancery Morrison, argued in court, and is now under advisement by Judge Landis.

THOMAS H. EDDEN HAS PASSED AWAY

Resident of Janesville for Past Sixteen Years; Dies After Lingering Illness.

The death of Thomas H. Edden occurred at his home, 1102 Grand avenue, last evening at ten fifteen o'clock, after an illness lasting for many years. Following a serious attack on last Thursday, the deceased gradually grew weaker until death came.

He was born in England, April 21, 1846, in Old London, England, and came to this country when but nine years of age. He settled first with his parents in the town of Clay, Onondaga county, New York. In September, 1864, he enlisted in the army and fought in the struggle between the north and south until May 30th, 1865.

He was married October 2, 1866, to Miss Mary M. Hanson of North Syracuse, New York, and came with his wife to Wisconsin on the 19th of the following month. They settled in the town of Harmony, residing there until sixteen years ago, when they moved to this city.

Mr. Edden leaves four children. They are Dr. R. W. Edden of this city; Fred Edden of Beloit; Mrs. John M. Melvin of Fond du Lac, and Mrs. Alfred Akin of Troy, Montana. Three brothers, Sam of this city, William of Little Falls, Minnesota, and George of Idaho, survive. Also one sister, Mrs. M. Murselt, resides in Royaton, Minnesota.

Funeral arrangements will be announced later.

TAKE FURTHER TESTIMONY IN THE ACTION BROUGHT AGAINST SURETY COMPANY

Further testimony was taken today in the case of John W. Peters and the Hayes Brothers company against the National Surety company which is being tried before Judge Grimm in the circuit court and which involves a considerable sum which the plaintiffs claim in guarantees due in the case of the construction work on the government irrigation project in South Dakota. Mr. Peters and Michael Hayes were witnesses called upon for exhaustive testimony today. The case will be in progress for several more days.

GOVERNMENT SEEKING INFORMATION AS TO THE SUGAR BUSINESS

Department of Commerce Sends Experts to Go Over Books of the Rock County Sugar Company.

Whether it is an attempt to bolster up the action of the government in reducing the import on sugar for some other reason, two experts of the department of commerce at Washington, presided over by Secretary Redfield, are at work on the books of the Rock County Sugar company, making a minute examination of every transaction during the past ten years, with a view of making a report on what basis the business was conducted and why it was discontinued. B. C. Arnold and John Knox Arnold, the two experts, and it is expected that they will be here for the next ten days at least before completing their work. Mr. Arnold would give no information as to the nature of the examination under way, but would state that he has been making examinations at other sugar beet factories. It is known, however, that similar investigations have been made at many of the Michigan factories and that other Wisconsin factories are to be visited.

A COCAINE THIEF CAUGHT TRYING TO ENTER OFFICE

However Makes Good His Getaway—Suspect Questioned But Was Released by Police.

This morning at four o'clock Dr. Charles Pierce, who also is a physician over the Hunt Drug store, was awakened by a man trying to climb over the transom into his office. The would-be thief was frightened away and while seen plainly by Dr. Pierce and his wife, the man made good his escape. It was learned later that the same thief had ransacked Dr. Welch's office, adjoining, although the only thing missing was a vial of medicine. The doctor thought that was in his medicine cabinet, but was called to the police station this afternoon and questioned, but was released after explaining his whereabouts last night and failing to be identified by Dr. Pierce, who caught but a glimpse of the fellow as he slipped up the street.

SCIENCE NOTES.

In a test made recently in France an airplane with only a moderately powerful apparatus for its engine, and which kept in constant touch with military wireless station during a flight which lasted several hours and during which the machine was at a distance of 60 miles. Messages were sent at intervals of about five minutes, and there was never a moment when the engine was not in contact with the station. The machine was one which had just been completed by Breguet for the Siamese government.

A freight terminal costing \$1,000,000 has been planned for Long Island City, which will give manufacturing concerns in that locality close connections with the railway system of the country. The property on which the terminal and piers will be located covers several city blocks, and the plans include a huge freight yard with a capacity of about 1,000 freight cars. The docks will accommodate the largest ocean-going steamships, and slips will be provided for the largest car floats that are used in this harbor. A belt-line railroad will connect the new Queens district business section with the terminal.

The prohibition of the celluloid film, as taken place in France, does not seem to be warranted according to some of the moving picture men of this country. The insurance companies of the United States have enacted rigid regulations for the protection of patrons of these theaters by requiring that the apparatus be enclosed in a casing of metal and asbestos, and, notwithstanding the fact that there now more than 13,000 of these institutions in this country, which are in almost constant operation, the number of film fires is very small. The quantity of film stored at one time in one of these booths is so slight that, under ordinary circumstances, no great amount of harm could be done if the entire stock of film should be destroyed.

Since the establishment of the first electric line up the side of Mount Blanc the bulk of travel has been trebled, and under the impulse of the undoubted popularity of this mode of mountain climbing the electric line has been extended either in operation, under construction or projected, to carry tourists to the more interesting spots of the great rock. One of those recently completed is the steam rack rail from Chamouix up to the Mer de Glace, opened in 1908. Another new line, partly in service, is the electric road from Fayet up Mount Blanc to the peak of Aiguille du Gouter. It is to be extended further up the mountain to a point near the summit. At present the road is constructed only as far as Mont Blanc. There is also in construction an aerial cableway up the mountain from Pelecin village to Col de Midi and Balise Vianche. A recent project calls for an electric road from Chamouix to Mont du Converve.

Washing White Paint.

When your white paint is yellow and dirty, don't wash with soap; take a handful of common whitening and stir smooth in about a pint of water; then wipe all around with this. You will need a bowl of clean water and a cloth with which to wipe all around again. When treated in this way paint will be really white, not yellow, and places that have been marked badly will scarcely show when dry.

SUGGESTIONS FOR CORN CONTEST

By ALLEN B. WEST.)

Now, boys, for the trip to Madison this fall when the acre of corn you are going to raise is harvested!

That you may do your best it will be necessary to use care in every step.

There are a number of Rock County boys going into the contest so there will be plenty of competition and plenty of pleasant companionship in the work and the prospective trip to Madison.

One of the most important steps in the raising of a good corn crop is procuring good seed and that is the thing that demands our attention right now.

As stated in the rules of the contest given in last Friday's Gazette the varieties for the contest are limited to Silver King, (Wis. No. 7) Golden Glow, (Wis. No. 12), Murdock and Reid's Yellow Dent. All purchased corn. The seed should be procured as early as possible for the early customers have the best to select from. In order to know just what sort of ears to select for seed it would be well if a score corn for corn were procured and studied, and when the ideal ear is well in mind the ears may be selected according to the standard. Corn will produce much like the parent ear so it is important to procure seed from well formed ears. To quote from Iowa Circular No. 19, "You cannot afford to plant even one poor or ordinary ear. It only takes from 12 to 15 ears to plant an acre. To have this number of extra good ears, after you have thrown out all that do not give a good germination test, or are not well formed, you will have to begin with a much larger number at first. A good ear should be as large as you are sure will mature in your locality. It should be full in the middle part and taper slightly toward the tip. If it is not, there may be a considerable waste space next to the cob. Then the kernel must not be too deep. A deep kernel is later in maturing. It should have a large bright germ. This indicates that it will grow strong and also have a high feeding value. Have all of the ears as nearly uniform as possible in size and with the same kind of kernels. This will give you corn that will ripen at the same time."

Having selected the ears the next step is to test the germination of each ear. One poor ear may make a difference of bushels in your yield so you cannot afford to neglect this point. Don't take anyone's word on this but make your own test. As the Iowa bulletin says, "There must be no guessing about this. One know is worth a load of guesses."

There are many ways of making a tester but the simplest and most satisfactory all around tester is known as the Rag Doll tester, which is made as follows: Procure sheeting of good quality and tear into strips from 8 to 10 inches wide and 3 to 5 ft. long. If the house is supplied, as most houses are, with cotton flour sacks, these are as good as anything and may be used just as they are. If new cotton is used it is best to hem it as the ravelings are apt to displace some kernels in unrolling. One sack or strip will be sufficient for corn for an acre. It should be marked with a heavy pencil—a carpenter's pencil is a good one for this—lengthwise down the middle and then crosswise making squares, which should be numbered 1, 2, 3, etc. The cloth should then be moistened and laid out on a board of convenient size in front of the ears which are to be tested.

Now get your corn for testing in the following careful manner.

1. Lay the ears of corn on a table, bench, board or on the floor where they will not be disturbed.

2. You must be careful to preserve the identity of each ear until the test is completed. For this purpose, write numbers, from 1 to 20 inclusive on little tags or pieces of paper and fasten a number to each ear by tying a string or placing a rubber band around the ear, or by sticking a shingle nail or pin through the tag into the cob at the butt end of the ear. Do not allow these tags to get misplaced after you have started the test.

3. With your knife, remove six kernels from each ear, placing the kernels directly in front of the ear from which taken. Be careful about this, so that kernels from different ears do not get mixed. Proceed in this way with each ear.

(a) Take one kernel from about 2 inches from the butt of the ear.

(b) Take one kernel from middle of ear.

(c) Take one kernel from about 2 inches from tip of ear.

(d) Take one kernel from near the butt, as before.

(e) Take one kernel from middle, as before.

(f) Take one kernel from near tip, as before.

In order to get kernels from different parts of the ear, (b), (c), (d), (e), and (f) should each be taken from a row about 1-6 of the way around the ear from the one before it. (Turning to ear 1-6 after taking out each kernel will do this.) This gives you six kernels from six different parts of the ear.

4. Place the kernels from ear No. 1 in square No. 1; from ear No. 2, in square No. 2; etc. Arrange the six kernels evenly in two rows inside the square on the cloth.

5. If 2 or more kernels do not grow, call it a "bad" ear.

6. When you read the test for each ear, place the ear where you will know just what to do with it afterward. If the test shows that the ear is "strong," place the ear aside for planting.

Place ears that test "weak" where you can try them again if you desire.

Place "bad" ears where they will have no chance to get mixed with your good ears.

Final Selection: All except "strong" ears should be rejected for seed purposes. Your final selection should include only ears which have shown by the germinating test that they will grow and will produce strong plants. You cannot afford to give standing room on your acre to weak stalks which came from weak kernels. Every foot of ground on your acre must be doing its part toward producing good ears of corn if your total yield is to be as great as you can make it.

When the cloth has been filled, begin at either end and roll the cloth up. If the cloth is well moistened the kernels will not push out of place. When the cloth has been rolled, tie a string around each end rather loosely, or better still, use a rubber band.

After the roll has been filled it should be placed in a bucket or tub of water where it may remain from 2 to 18 hours, depending upon the preference of the operator. At the end of this time pour off the water and turn the bucket or tub upside down over the roll or use a common dry goods box for this purpose. A couple of small pieces of wood should be laid under the rolls, and one edge of the roll should be lifted from 1/2 to 1 inch in order to give ventilation.

The rolls should be kept in temperature above such as found in the kitchen. It must not freeze.

At the end of 6 days the kernels should be ready to test. Unroll the cloth in front of the ears represented. Examine all kernels carefully and in all cases in which all 6 kernels are not strong in germination the ear should be thrown away, unless, in case there are five that are strong and one weak, it might be tested again.

Great care should be used right here not to get ears mixed. The "strong" ears should be laid aside for planting and the others put where they will not get mixed with the good ones.

If the test gives more good ears than is needed to plant the acre after rejecting kernels from butts and tips and those that are undersized or over sized or broken or imperfect kernels, seed may be kept for replanting any missing hills or planting border rows about the plot.

Be sure always to shell the corn by hand for planting.

Thrifty Welsh Farmers.

In Wales, when the farmers want woodpigeons to make a dainty dish they are said to climb the trees while the birds are young and tie the legs of the nestlings to a neighboring bough. The parents then feed them till they are quite grown, when the farmer's boy climbs the tree again, and plump birds are secured for supper with a minimum of trouble.

When Packing China.

Get a number of stout boxes, one fitting in the other, and a quantity of excelsior. Put but a few pieces in each box and embed these in the wrapping material. Place each box inside one larger one, and pack tightly around each one, so that they are well wedged in. The outside box may then be marked and sent safely on its way.

FORTY YEARS AGO

The Janesville Daily Gazette, April 28, 1874.—The Janesville Old Fellows, led by the Bower City Band, made a splendid appearance on our streets this afternoon, prior to their departure for Monroe. About 100 members appeared in the procession, quite a number going direct to the cars in company with their fair Rebecca. The great feature of the celebration at Monroe is an oration to the Odd Fellows by Hon. Schuyler Colfax, after which a dance.

Accidental Drowning—The telegraph has already announced the death by drowning of a squad of soldiers belonging to the Fifth U. S. infantry at Fort Gibson, in the Indian territory, on the twentieth of April. One of these soldiers, Corporal John J. Brown, was for a long time a member of our department and was connected with No. 1 engine company.

Since the removal of the Y. M. C. A. to their new location over the post office, the daily prayer meeting seems to have lost nothing in interest or numbers, but rather gained.

The Bower City Band social was postponed last evening because of the snow storm.

Old English Rowing Costumes.

English rowing men a century ago wore costumes far different from what they wear now. In 1805 it was the correct thing for them to wear a green leather catskin cap with a jacket and trousers of nankeen. In the first university race at Henley, in 1829, Oxford won, wearing blue checks, while Cambridge was in white and pink waistcoats. Broad-brimmed, heavy straw hats came in a little later.

WOMAN'S PAGE

The Evening Chit-Chat

BY RUTH CAMERON

TAKING TOO MUCH RESPONSIBILITY.

"NOBODY in this house will take any responsibility except me," I heard a tired mother say the other day.

What she said was true. At least, to a large extent. Her husband is an irresponsible, happy-go-lucky person, who looks five years younger than his wife although he is actually a year or two older.

Her children are extravagant about money matters, disorderly about the house and careless in regard to their clothes. Their mother has to "keep after them all the time," as she puts it. The oldest daughter is simply old enough to take some of the care from her mother's shoulders but she never does. Her share of managing the house consists in performing, certain small, routine tasks, and even her mother has to see that the work is done and done right.

Naturally the mother of this irresponsible family, although normally a robust and energetic personality, is becoming worn out.

I don't blame her for feeling discouraged and over-burdened, and yet neither do I entirely blame her family.

For one of the chief reasons why they are so irresponsible is that she is so responsible. Responsibility is not a thing that most people crave. When one member of the family gets into the habit of taking it, the rest of the family slip into the habit of yielding it.

Almost from her wedding day this woman began to take the responsibility of the family upon her shoulders. She liked to lead and rule, and responsibility came natural to her. Her husband was a rather easy going person with no great sense of responsibility.

Had he married a different sort of a woman I think he would have developed that quality. As it was he developed in the opposite direction. When the children came the same thing happened to them.

And now the mother is growing older, and she begins to find all this responsibility which she has arrogated to herself a burden too heavy to bear.

Poor, unhappy creature. I can't say I'm not sorry for her, because I'm always sorry for people who make mistakes. I've no patience with the sentiment "she's made her bed and now she can lie in it." But I do think she has no right to put all the blame on her family. One of the best stories I ever read told of a woman who had more business ability than her husband, and who, when he lost his position, went out into the business world and made good. Then instead of sharing the responsibility for supporting the family with her husband she began to take it all. Her husband gradually came to depend on her even for his own clothes and spending money. Ultimately she divorced him and married a woman of the other type, went back into the business world and, pushed forward by his new sense of responsibility, made good.

Every human being ought to beware how he takes more than his fair share of responsibility. Whoever takes too large a share is laying up a burden for himself and robbing his fellow creatures of their birthright. They may be willing, just as Esau was willing, but he has no right to do it and sooner or later everyone concerned will suffer.

into the hair, let dry, then rinse out with lukewarm water in which you have put a little baking soda. Rinse again in several clean waters, then brush the hair dry. Let it hang loose as possible.

(2) If your classmates went, it seems that you should have also gone. Your mother, or father, would have taken you there and called for you when ready to go home. However, it's always best for a girl of your age to abide by what your parents think is best and to be as cheerful as possible about it.

(3) Both white and tan are much worn.

(4) I suppose a girl thinks of fellow at almost any age. She should never make them the most important things in her life unless she meets the one whom she really loves and who wishes to marry her. A girl's courtship time is from seventeen years on.

My Dear Mrs. Thompson: (1) If a boy is on the cat with a girl, is it right for him to give a lady his seat and leave his girl?

(2) Where can a girl and boy spend Sunday? We do not go to shows. I am a year old and have been going with a boy of 15 years. My mother said she thought it was all right. I go to his home and talk to his mother. I do not go with any of the boys, but I want to run after the boys, and mamma does not think it is right.

(3) Is it best to go with him all alone? That is not to go with a girl alone. A boy should always be courteous to other women as well as to the girl he is escorting. Some girls think that it is wrong for a boy who is with them to be decently polite to other girls or women. But if he isn't he is not gentlemanly. It is always correct for a boy or young man to give his seat to a woman or an elderly person in a street car, whether he is escorting a girl or not.

(4) Why, my dear, isn't home a nice place to spend Sunday afternoon with a boy friend? You can play all kinds of games at home, or read, or have music and chat with the rest of the family. You might take walks, too, in nice weather—only to be sure to tell your parents where you are going and when you will be back, so they won't worry about you.

(5) If mother approves it is all right, dearie. I am glad you do not go with girls who are boy-crazy. (6) Better find some nice girl friends, too. There are a lot of them, you know.

The Kitchen Cabinet

THE men whom I have seen succeed best in life have always been cheerful and hopeful men, who, about their business with a smile on their faces, and took their changes and chances of this mortal life like men.—Kingsley.

SOMETHING NEW.

Cuban Dish—Peel and slice four Bermuda onions into cold water. Leave them there half an hour and dry them well by laying them in a cloth. Have ready in a deep saucepan a dozen ripe tomatoes sliced thin, heat them slowly while you fry the onions in butter to a light brown. When the tomatoes are soft and thoroughly heated, season with salt a teaspoon of sugar and a few dashes of paprika. Add four young okra pods, canned will do, sliced thin, bring to the boiling point and add the fried onions. Cook fast for 15 minutes. Line a platter with a well buttered toast and pour the "olla" over them. Set in the oven for three minutes to soak into the toast and then serve.

Genoa Dish—Stew a dozen tomatoes until soft, season with sugar, salt and cayenne to taste. Rub through a colander and return to the fire. In a deep frying pan heat three tablespoons of butter; break into it rapidly six eggs, stirring all the time. As soon as they are broken and mixed, pour on the tomatoes. Cook for 2 minutes, stirring all the time, then add three tablespoons of Parmesan cheese. Turn out and eat with brown bread. This makes a fine Lenten dish.

Lamb's Liver en Casserole—Lay the liver in cold water slightly salted for a half hour to draw out the blood. Rinse it then wipe dry. Fry slices of fat salt pork until crisp and brown, six of them, put them into the casserole and fry six slices of onion in the fat. Take out the onion and add the liver to the fat and brown well all over, add a little soup stock to cover thickened with flour and butter mixed together, add a few small potatoes or cut them in balls, a few onions the same size, a little parsley, put all in the casserole and cook for two hours. This makes a whole dinner with a light dessert and it may be served piping hot right from the casserole. Any kind of meat liked may be prepared in the same way.

Household Hint

THINGS WORTH KNOWING.

If eggs are placed in hot water a few minutes before breaking the whites will separate from the yolks very easily. They must be cooled before whipping up the whites. To prevent moths from invading drawers and boxes where woolen goods are stored, sprinkle a little turpentine in the drawers or boxes every three months. To clean coral soak it in soda and water for some hours, then make a lather of soap and scrub with a soft-bristled brush, rinsing daily in clear water and drying.

THE TABLE.

Cecils With Tomato Sauce—One cup of cold roast beef or raw steak finely chopped, salt, pepper, onion juice, Worcestershire sauce, two tablespoons of bread crumbs, one tablespoon of melted butter, yolk of one egg slightly beaten. Season the beef with salt, pepper, onion juice and Worcestershire sauce; add the remaining ingredients, shape after the form of small croquettes, pointed at the ends. Roll in flour, egg and the crumbs and fry in deep hot fat, drain and serve with tomato sauce.

Veal Loaf—Take three pounds of lean veal and remove the skin and the membrane. Chop finely or force through a meat chopper, then add one-half pound of fat salt pork (also finely chopped), six common crackers (rolled), four tablespoons of cream, two tablespoons of lemon juice, one tablespoon of salt, one-half tablespoon of pepper and a few drops of onion juice. Pack in a small bread pan, smooth evenly on the top, brush with the white of an egg and bake slowly three hours, basting with one-fourth cup of pork

fat. Prick frequently while baking that the pork fat may be absorbed by the meat. Cool, remove from the pan and cut in thin slices for serving. **Sweet Potatoes, Georgian Style**—Season mashed boiled sweet potatoes with butter, salt, pepper and sherry wine. Moisten with cream and beat five minutes. Put in a battered baking dish, leaving a rough surface. Pour over a syrup made by boiling two tablespoons of molasses and one teaspoonful of butter five minutes. Bake in the oven until delicately browned.

Wine Jelly—One-half box of gelatin or two tablespoons of granulated gelatin, one-half cup of cold water, one and two-thirds cups of boiling water, one cup of sugar, one cup of sherry or madeira wine, one-third cup of orange juice, three tablespoons of lemon juice. Soak the gelatin twenty minutes in cold water, dissolve in boiling water; add the sugar, wine, orange juice and lemon juice; strain, mould and chill. If a stronger jelly is desired use more wine in place of the orange juice.

Frozen Orange Souffle—One and one-half cups of orange juice, one and one-half cups of sugar, two tablespoons of lemon juice, yolks of five eggs, one and one-half teaspoons of granulated gelatin, three tablespoons of boiling water, two and one-half cups of cream, candied orange peel, pistachio nuts. Mix the fruit juice, sugar and the yolks of the eggs, cook over boiling water until the mixture thickens; then add the gelatin dissolved in boiling water. Cook freely to a mush, add whip from cream and continue freezing. Mould and serve garnished with candied orange peel and pistachio nuts.

A Cake of Soap and a Package of Borax

Will clean anything in the house from cellar to garret. 20 Mule Team Borax is a marvelous aid to soap, and should be used wherever soap is used. It increases the cleansing power of soap, and produces wonderfully improved results.

"The Borax with the Soap Does the Work"

Besides, Borax has many valuable uses where soap is not necessary.

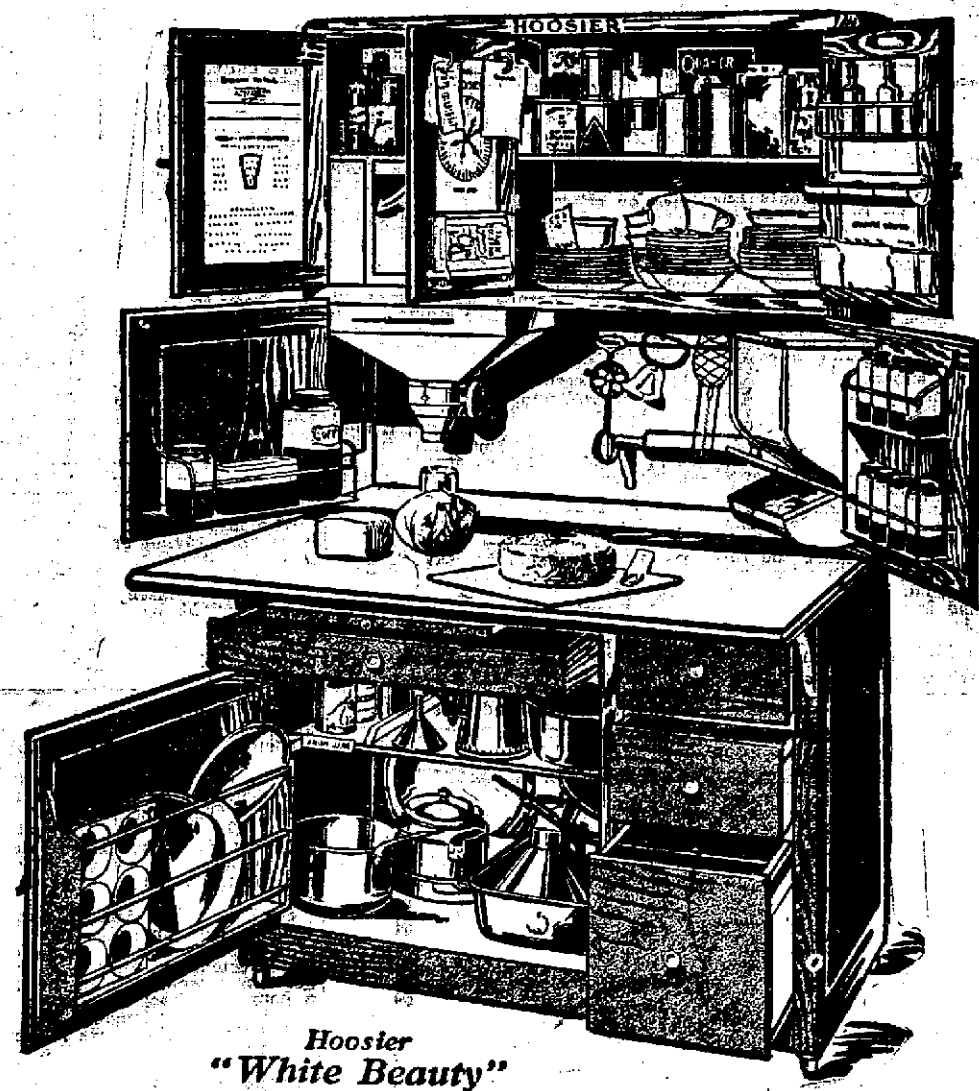

Borax makes everything hygienically clean, because it is an antiseptic and a purifier, as well as a cleanser. Use it in the Laundry to make your clothes whiter; in the Kitchen to cut grease from pans and dishes; in the Bath to soften the water and cleanse the pores of the skin; and use it all about the house for all cleansing purposes. There is nothing better.

Hoosier "White Beauty"

Here Are Three Questions You Must Consider Now:

1. Should I be glad to have the NEW HOOSIER in my home—knowing that I now take miles of unnecessary steps?
2. Shall I order now while a single dollar puts it in my kitchen?
3. Shall I wait—knowing that delay will surely lose me the opportunity to benefit by the liberal terms of the HOOSIER PLAN?

All the Best Kitchen Devices known to the 700,000 women who now own Hoosier Cabinets are combined in the new Hoosier. It is the most scientifically convenient cabinet ever built.

SEE IT IN OUR WINDOW Notice how you sit down in front of the table for work. NOTICE MRS. FREDERICK'S FOOD GUIDE—now part of the Hoosier equipment. Come and see how it answers the daily problem, "What shall we have for dinner?" This alone in a year's time is worth almost the price of the cabinet.

THE NEW SHAKER FLOUR SIFTER is another great Hoosier achievement. It cannot wear out. It cannot grind grit or dirt through. See it work. With forty such conveniences combined in the Hoosier you see why it saves you the eternal drudgery of kitchen walking that saps health and good looks.

Every woman who has seen this Hoosier has expressed surprise at the low price for this truly wonderful cabinet.

Here is the easy Hoosier Plan in detail:

1. \$1 puts the Hoosier you select in your house.
2. \$1 weekly quickly pays for it.

This club is limited to only 25 persons, and positively will not be continued after this week. Already many Ladies have been enrolled.

A Factory Representative will be pleased to explain the cabinet to you any day this week.

The Only Place In Town Where Hoosiers Are Sold.

More Features that help make this new HOOSIER the greatest labor-saving machine you could put into your kitchen.

We have described already—

1. The Housekeeper's Food Guide.
2. The Cook-Book Holder.
3. The Metal 50-lb. Flour Bin.
4. The Wonderful Shaker Sifter.
5. The Metal Linen Drawer.
6. The "Emergency" Shelf.
7. The New Bill File.
8. The Handy Money Tray.
9. Eight Crystal Glass Spice Jars.
10. The New Condiment Cupboard.
11. The Sanitary Table Top.
12. The Convenient Pan Pocket.

Now notice these:—

Every feature listed and described has been thoroughly tested and proved practical in the Hoosier Experimental Room.

(13) At the top and on the right-hand side of the Hoosier is a handy package cupboard that holds forty or more packages, such as cereals, gelatin, baked beans, catsup and other miscellaneous articles needed in preparing meals. This shelf is within easy reach.

(14) Just below the package pantry is the dish cupboard holding 70 or more dishes. It is easy to keep the necessary dishes for your regular meals here, thus saving time and steps and adding much to the scientific system of your housekeeping.

(15) The Patented Clock for want-list is praised daily by thousands of women who own Hoosiers. It has the names of all articles you ordinarily order for the household, arranged in circles with clock-hand indicators which can be set to point out the several needs. It is quickly manipulated and a great convenience.

If you will come into our Store and sit in front of a Hoosier you will appreciate these features to the fullest extent. Word descriptions cannot do them justice.

(16) The sanitary metal table top slides out 18 inches from the base, forming the handiest and most satisfactory base to work on and down to any kitchen. Nothing sticks to its surface. It is cleaned with perfect ease.

40 Special Features 17 Entirely New

You should settle this matter now one way or the other. Why risk losing the chance to SEE these features themselves? Come down tomorrow, and look over each cabinet carefully and decide which contains the most features you need. Looking doesn't obligate you at all and it surely will help you to determine this matter fairly to yourself.

Women Worth While

SENORITA LUZ MENDEZ.

By Selene Armstrong Harmon. The old Spanish ideas regarding women, ideas which were in existence a quarter of a century ago, have almost entirely passed from our sister-republics in Central America. For we find today that the daughters of the ministers from that country are as fully up-to-date and independent as any American girl.

Prominent among them is Senorita Luz Mendez, the handsome young daughter of Senor Don Joaquin Mendez, minister from Guatemala. The word Luz, when translated into English is the equivalent of "light," a very appropriate name for this girl from a land of eternal sunshine and roses.

Senorita Mendez was early sent to receive her education in Paris at the Sacre Coeur convent, a custom which is universally observed by the old families of Guatemala. Here she made herself proficient in French, which she speaks as well as if it were her native Spanish. She also traveled extensively in Arabia, Turkey, Egypt and the Holy Land, visiting the scenes of the birth and death of Christ.

On returning home about three years ago she, at once accompanied her father and mother on the former's new mission to Washington. As Senor Mendez was in poor health, it fell to the lot of the daughter to play the part of hostess, a position which she filled with grace and dignity.

While fond of society, the chief pleasure of Senorita Mendez is in literature. She likes dancing and is an accomplished skater, but writing is her one passion. Meisner, the famous painter, is a relative of the Mendez family. Senor Mendez writes poetry, so it is no wonder that Senorita Luz is regarded as the possessor of unusual talent.

Her notes of foreign travel have been kept and will probably be one day published in book form. And it is equally probable that a volume of verses may appear from her pen. Senorita Mendez is a typical Guatemalan maiden, with a handsome figure, heavy dark hair and a rich complexion of rosy, olive skin.

Heart and Home Problems

Dear Mrs. Thompson: (1) Is it all right for girls of 13 who have a nice home to think of boys?

(2) My hair is very short and thin. I have tried in every way to make it grow. Would it be all right to wear false hair?

(3) I was invited by a boy to his home to spend the evening. It being his fifteenth birthday. There were no girls in his home and his mother is dead. He had a step-mother. My parents objected, so I could not go. Should I have felt angry. My classmates went. Who was right?

Shunday, white shoes or tan slippers?

(4) Which are worn the most for fore thinking of fellows?

A READER.

(1) If the boys are your friends it is natural that you should think of them once in a while. However, it wouldn't be best, dear, to think of them all the time. There are lots more important things to think about at your age.

(2) If you wear false hair you will lose the rest of your natural hair. You will massage your scalp every night with yellow vaseline. It will help the hair to grow. Every morning give it at least 300 strokes with a good clean brush. You must do these things every day if you want good results. Once a week dip your brush in kerosene (coal oil), shake it out, then brush your hair well with that. If your hair seems too greasy after the brush wipe with a clean towel. The hair will look rather greasy under this treatment, but you must persevere if you want more hair. Once in three or four weeks, beat up a couple of eggs, rub this well

MUST ELIMINATE ALL PROFESSIONAL HELP

Contestants Entered in Events With Beloit Are Obligated to Study Out Their Own Selections.

The eight contestants, four representing the Beloit high school and four from the Janesville institution, who met on Wednesday evening, May 6th, in the school contests for oratory and declamatory honors, are forced to master their own selections, this year without any professional help. Special training from any of the faculty members is, however, being tolerated by the school.

The contestants for the Janesville high school have taken all precautions against any professional help, and have resorted to their own individual knowledge of the work in preparing themselves for the crucial events on May 6th.

It is generally understood that the winners of first place in both contests will be represented in the district school events to be held probably at Whitewater within a few weeks. The winners in the district contest will then represent their respective schools in the state oratorical and declamatory contests to be held presumably on May 24th.

Janesville high school have had many prominent speakers in its history who have made a great showing in the district and state events. Three years ago it was George Yahn, who won second place in the state contest, held in the local auditorium, a Marshfield school boy defeating him for first place by a very close percentage. A total of twelve intelligent speakers were entered on that night. On that same night Ruth Humphrey succeeded in capturing second place, after a nerve straining contest, in the state event held at Fond du Lac. The former success in the local high school has been short of marvelous, and it is hoped that the present four competitors, including Allen Dearborn, Stanley Horwood, Evelyn Welsh and Ruth Doherty, will uphold the fine record already established on the platform by the blue and white in the coming events.

GOVERNOR THOS. J. NEACY POST SAYS APPLETON POST

The Appleton Daily Post, in an editorial covering two columns, suggests Thomas J. Neacy, Milwaukee, for governor.

"As Tom Neacy, he is known to the millionaire and the day laborer, to the person of exalted station and the person of low degree," it says. "There is not prefixed or affixed to his name artificial titles suggestive of royal strain. He is not ennobled as a society swell or captioned as a knight of distinguished mien. Horizontally and perpendicularly, he is Tom Neacy, from the crown of his head to the circumference of his boot-heels."

"From the general and personal knowledge that The Post has gained, it is prepared to say that everything in the life of this man commends him to the electors of the state. He was born of humble parentage and is self-educated."

The Post at the same time publishes a letter from Col. J. A. Watrous, Milwaukee, who also commends Mr. Neacy, and says that at 65 he is one of the liveliest wires in Milwaukee.

"Mr. Neacy is the kind of a candidate I can vote for next November with a real relish," he says.

FIND ITALIAN IS GUILTY OF CHARGE

Jury Finds One of Three Italians Arrested Sunday Guilty of Violating State Game Laws.

Yesterday afternoon the jury, composed of W. B. Conrad, Charles Lindquist, Charles Cullen, Simon Minnick, C. Fredendall, William Booth, found that Niccolus Dependo, who yesterday was called E. J. Berry in the warrant, guilty of violating the state game law hunting rabbits.

Vito Masto and Mike Snaderadio were released, the jury finding them not guilty.

The testimony of W. P. Mason, W. S. Gary, W. A. Brennan and Edward Benny for the state and John Patten and three defendants for the defense showed that Dependo owned the gun which the three Italians were alleged to have been hunting with at the stone quarry and on this point the jury found him guilty.

As none of the three Italians could understand English, Edward Benny acted as an interpreter. When Dependo was placed on the stand and was being cross examined by District Attorney Dunwiddie on how he understood the English language, the game warden, the Italian replied that he fully understood English when Wardun Mason pulled back his coat lapel and showed him his star. The sight of the badge was English enough to let him know he was "pinched." Over thirty members of the section gang were in court throughout the trial. Due to misunderstanding the three were reported to have been employed on the Northwestern road, but a translation of the evidence showed they were under the employment of the St. Paul road.

Sentence will be passed by Judge Maxfield at four o'clock this afternoon.

ASK REVOCATION OF CERTIFICATE GIVEN

The Cincinnati Construction Company Five Years Ago—Janesville-Madison Traction Company Applicants.

On May 12, the Wisconsin railroad commission will hear arguments on the petition filed by the Janesville and Madison Traction company in which they are asked to revoke the certificate of convenience and necessity granted on December 16, 1909 to the Cincinnati Construction company. This latter company it will be remembered was one of the many that have been projected to build a railroad between Janesville and Madison. Behind it were supposed to be Columbus and Cincinnati capitalists and Joseph Ellis was the engineer in charge, making his headquarters at Janesville and Edgerton, and later at Madison for the best part of two years. Aside from making some sort of a survey and obtaining the certificate this company never accomplished anything. In order to clear the way for another company to obtain a similar certificate this must be revoked and it is with this view that the hearing is held. Ralph Jackman, son of Mr. and Mrs. C. W. Jackman of this city, is one of the attorneys for the Janesville and Madison Traction company which announces its purpose to construct an electric road between the capital city and Janesville.

The Post at the same time publishes a letter from Col. J. A. Watrous, Milwaukee, who also commends Mr. Neacy, and says that at 65 he is one of the liveliest wires in Milwaukee.

"Mr. Neacy is the kind of a candidate I can vote for next November with a real relish," he says.

FIRE MARSHAL HAS SOME SUGGESTIONS

Clem P. Host Talks on Fire Prevention Day Which is Friday Next. Issues Proclamation.

Clem P. Host, state fire marshal, has just issued the following circular on "Fire Prevention Day," which should be one of interest to Janesville residents who plan to make Friday and Saturday next the regular clean-up days.

Hon. Francis E. McGovern, the governor of our state, has by proclamation designated May 1st as "Fire Prevention Day," as well as "Arbor and Bird Day." He concludes his proclamation by using the following language: "But while thus recognizing the value of the beautiful, we must not overlook the importance of security. Hence this day is also designated 'Fire Prevention Day,' and I recommend that it be set apart by all as a day for clearing away any unsightly rubbish and disposing of all inflammable material that may in any way add to the risk from fire."

Few persons in all probability realize the extent to which there is a direct responsibility for fire. Oftentimes the origin of the fire is unknown and not infrequently the cause is laid to spontaneous combustion. Yet the chances are that if the facts were known, it would not be difficult to establish a human agency for the starting of the fire. If carelessness of this sort could be stopped, the majority of fires would never start.

One of the most fruitful sources of fire is in the waste heap. Of course a waste heap of itself is not going to set anything afire; but it can offer a mighty big assistance. And, that is through such assistance often, that the fire grows so destructive.

Some one throws a cigar stub or a cigarette into a pile of waste, and proceeds to forget about the incident. Even when the firemen arrive, it is difficult if the fire is not extinguished, the origin of the blaze.

Perhaps some one lights a lamp or lantern, and with a wave of the hand, leaves it as is. The flourish of the match, of course, is expected to put out the blaze, and generally it does. There may be a spark left, however, that will glow for a little time and ignite something against which it has fallen. The result is a blaze, and oftentimes a big one.

Perhaps the insulation has worn off of some of the electric wires in a house or other building. You delay having repairs made, and the result is a costly fire. Defective wiring is the cause assigned in the record of the fire chief, when defective headwork is frequently the real cause.

Even the chimney flue comes in for its full share of fire started. The owner of the house may know his flue is in bad shape, but here again nothing is done until it is too late.

It waste were not allowed to collect in corners and byplaces; if chimneys, heating and lighting apparatus were all kept in proper shape; if men and women were thoughtful in the use of matches; there would be decidedly fewer fires and far less loss of life and property.

Mr. and Mrs. J. L. Rogers, of Madison in the state and retains all his faculties to a wonderful degree.

TRAINING SCHOOL NOTES.

The members of the training class have been giving oral reports on the Mexican situation.

Friday afternoon the principal attended a mothers' meeting at the school building, Helen Gray, three miles north of Beloit, gave the report.

Bar line. Several mothers were present. Mr. Louth spoke on "The Relation of the School and the Home."

Miss Lizzie Patterson, former principal of the Jefferson school, has presented the training school several good books on teaching.

Supt. H. C. Buell spoke to the students Tuesday afternoon on the subject of "The Geography of Wisconsin."

The talk was instructive and entertaining. Mr. Buell addresses the members of the school on some educational topic at least once each year.

Supt. O. D. Antisdel gave the school, and especially the members of the senior class, some very useful information, directions and suggestions a week ago on the duties of a country school teacher in particular, so far as keeping the record and making out reports is concerned.

The young women who observed and practiced in country schools in various parts of the country the first part of the week have the whole school some very interesting and helpful reports concerning their experiences.

The training school greatly appreciates the co-operation of the rural teachers in this important enterprise.

The members of the graduating class are giving essays upon professional topics, such as the following: "Growing Teacher," "An Ideal Country School House," "The Spirit of the Teacher," "Mother's Guide," "School Gardens," "The Need for Consolidation," "The Needs of Country Schools."

The members of the graduating class are as follows: Margaret Arneson, Josephine Barrett, Frances Byrne, Marie Dabson, Nellie Hendrickson, Vera Irving, Edna Kealey, Hazel Logan, Mary Madden, Arice Smith, Jeanette Tollefson, Pearl Trumble, Ruth Treatie, Katherine Knight.

A recent addition to the library is a fine new book entitled "Better Rural Schools" by Betts and Hall. The text is illustrated with a large number of attractive cuts illustrating country scenes.

The present series of mothers' meetings to be attended by the principal, comprises the schools taught by the following teachers: Helen Gray, Hene Sande, Florence Nelson, Nora McCarthy, Nellie Maloy, Edna Loomis, Rachel Ehringer and Corrine Crandall.

Principal and Mrs. Louth gave a stereopticon entertainment Monday evening in the school taught by Esther Barium, six miles northwest of Orfordville.

A box social was a part of the program. The representative of the training school spoke also upon the subject of education.

Teachers using "Our Government" by James and Sanford, should make sure to have the 1914 edition. Out-of-date civics books are more or less of a nuisance.

Supt. Antisdel and Principal Louth conducted a listening meeting six miles west of Beloit recently in the school taught by Grace Wheeler. There was a good attendance.

Three Edison slides were shown on "Scenic Wonders of America" and "The Passing of the Indian." Mr. Antisdel also gave a brief talk on "The Importance of Interest in school work."

County school teachers ought to make use of the published proceedings of the county board issued annually and prepared by County Clerk Howard W. Lee. This report contains some good practical material on school teaching.

Train pupils to feel so round, and to want to know about real operations of government, especially local government.

If you don't get your copy of the new training school catalogue drop a card to the principal, and the book will be forthcoming by return mail.

Another Satisfied Customer

"We have a new hired man," said Mrs. (shall we say) Blinker? to her neighbor, Mrs. Greene. "A new hired man is no curiosity, but as Jack ran an ad for a man in our home paper, specifying just what kind of a man he desired, this man is rather unusual."

"Last year I had to go out in the field with Jack, as he could get no help. When he started to tell me what kind of a man he wanted this season, I reminded him of the trouble he had in even getting a specimen of the male sex last year and suggested to him that he take what he could get and be thankful. You see I was looking out for myself; did not want to go out in the field."

"Jack looked at me with a look that I have grown to know," "You don't fuss, girl," he said. "I am going to advertise for a man. Watch me."

"I was skeptical, but I managed to keep still. He advertised, and if I had not been home and answered the phone, I'd not have believed Jack had told me the answers he received. He ran rather a lengthy ad, telling about the work; the kind of a man he wanted. He got help, that to hear him tell it, should almost be in a glass cage, marked "exhibit, A," so full of good traits is he.

"Jack is satisfied, I am happy; no more field work for me when I want to be sewing for the children. I am a strong advocate of the want ad page, from now on. Well? Are you?"
